

Dr. Rosa Maria Bottino is a senior researcher of the Italian National Research Council (CNR) and she is currently the Director of CNR Institute for Educational Technology (ITD-CNR). Her research interests are in the field of educational research and the role of information and communication technologies for improving teaching and learning processes. She is the author of more than 100 scientific publications both in national and international journals, books and conference proceedings. Rosa Maria Bottino promoted and chaired both national and European projects and Networks of Excellence in Technology Enhanced Learning. She organized and participated in many national and international conferences and is member of international research associations and journal editorial boards.

Dr. Bottino received international awards like IFIP Silver Core Award and IFIP Outstanding Services Award, moreover, some of her papers received best paper awards at international conferences.

She has acted as expert evaluator of international projects and research institutions.

Some recent publications of Dr. Bottino

R.M. Bottino, M. Cerulli (2010), A cross-experiment methodology for networking research teams, in *Researching I.T. in Education: Theory, Practice and Future Directions*, A. McDougall (ed.), Charter 17, Routledge, Taylor & Francis Group, London & New York, 177-182. ISBN 978-04-15-56001-6.

R. M. Bottino, C. Kynigos (2009), Mathematics Education & Digital Technologies: Facing the Challenge of Networking European Research Teams, *International Journal of Computers for Mathematics Learning*, 14, 203–215. DOI 10.1007/s10758-009-9153-y

R.M. Bottino, M. Artigue, R. Noss (2009), Building European Collaboration in Technology-Enhanced Learning in Mathematics, in N. Balacheff et al. (eds.) *Technology Enhanced Learning*, The Netherlands: Springer Science, 73-87. DOI 10.1007/978-1-4020-9827-7_5.

R. M. Bottino, M. Ott, F. Pozzi (2009), Taking up the challenge of evaluating research results in the field of Technology Enhanced Learning, accepted for publication in

Springer Lecture Notes in Computer Science, ISI Proceedings for the 2nd World Summit on the Knowledge Society, WSKS 2009.

R.M. Bottino, M. Ott, V. Benigno (2009), Digital mind games: experience-based reflections on design and interface features supporting the development of reasoning skills, in M. Pivec (ed.) Proceedings of the 3rd European conference on games based learning, ISI proceedings, Reading: Academic Publishing Limited, 53-61, ISBN: 978-1-906638-47-4.

R.M. Bottino, G. Chiappini (2008), Using activity theory to study the relationship between technology and the learning environment in the arithmetic domain, in L. English (ed.): Handbook of International Research in Mathematics Education (Second Edition), New York: Routledge, 838-861.

R.M. Bottino, J. Earp, G. Olimpo, M. Ott, F. Pozzi, M. Tavella (2008), Supporting the Design of Pilot Learning Activities with the Pedagogical Plan Manager, Learning to live in the knowledge society, IFIP – International Federation for Information Processing - Book Series, Boston: Springer, 2008, 37-44; DOI: 10.1007/978-0-387-09729-9_5.
